solutions provider in the Philippines.*

About Macrologic

MACROLOGIC DIVERSIFIED TECHNOLOGIES, INC.

Founded in May 25, 2012, Macrologic Diversified Technologies, Inc. (MDTI) is an IT company with cutting edge capabilities across primary industries, including manufacturing, services, government in the national and local levels, the academe, and multiple other entities and enterprises. Macrologic offers a wide range of applications and strategies to address any challenge that valued clients may experience or require solutions for. Its Systems Integration model, partnerships with the leading Technology Vendors and ISV's, skilled human resources – Certified Technical Engineers, Sales and Marketing Professionals, support contingents, and overall business presence in the country's key regions are instrumental in the fulfillment of customer delivery and achievement of market success as a whole.

With innovation in the forefront of its operations, Macrologic pioneered and continues to lead in the local cloud infrastructure known today as MlaaS Cloud Services. MlaaS, a multi-site cloud built from the leading technology brands, utilizes the VMware vCloud Director to provide clients a secured, stable and robust multi-tenancy platform for public cloud. With the rapid growth of its ecosystem for cloud, Macrologic offers a wide range of cloud services from IaaS to SaaS, PaaS, DRaaS, BaaS, MSOCaaS, Cloud ServiceDesk and a lot more. MlaaS is a VMware Cloud Verified, the first in the country to achieve competency certification for VMware Cloud.

Vision

To be recognized as a reputable key IT player in the international market delivering secured, robust, flexible and business adaptive technologies and solutions for the incessantly evolving landscape of the IT industry for on-premise, hybrid, and cloud computing environment, having met global standardization, security compliances and corporate discipline.

Mission

Macrologic, together with its contributing stakeholders, will continue to transform and innovate the next generation of digital modernization through sustainable partnership, constant growth, customer care and worldwide reach while uplifting the advocacy for green earth and corporate social consciousness.

OUR BUSINESS CORE VALUES

- **Innovation** – Macrologic's innovative approach is an unmatched value that customer can take advantage of. It pioneers the local cloud infrastructure; MlaaS Cloud Services and partnered with AWS and other cloud providers for any resources that client may need on cloud, multi-cloud, hybrid including on-premise.
- **Business Process Standardization and Security Compliance** – Macrologic's continuous improvement in operation entails standard best practices through ISO Certification, Vendor led compliances and Cyber Security initiatives. Currently, it's an ISO 27001:2013 Certified for Information Security Management System with ongoing compliances for ISO 27017:2015 Code of Practice on Cloud Security based on ISO/IEC 27002, ISO 27018:2019 Code of Practice for Protection of Personally Identifiable Information (PII) in Public Clouds and ISO 22301:2019 for the establishment of Business Continuity Management System. Its MlaaS Cloud Services achieved VMware Cloud Verified status, ensuring customers that its cloud offering complies with all the pre-requisites and standards set by the Vendor; VMware by Broadcom. All these processes, security compliances and standards are the pillars of delivering services to our valued customers.
- **Certified IT Professionals** – trained and certified Engineers based on the leading brands and technologies in the IT industry; IBM, Lenovo, HPe, Cisco, Dell, Sophos, Fortinet, VMware, Microsoft, SUSE, Veeam and a lot more ensure customers' success when they choose Macrologic as their trusted partner for IT related initiatives.
- **Proven Track Record and Expertise** – honed by experience and up to date trainings, Macrologic is more than capable to deliver the suitable, economic, and effective technology that the customer would be needing to enhance its business operation and stay competitive in the market may it be on cloud, on-premise or hybrid environment.
- **Partner Ecosystem** – our partnerships with the leading technology brands ensure that the solutions and services to be provided are based on industry standards, come with Vendor support and proven technologies that are developed and tested from the highly sophisticated research and development facilities.
- **Customer Care** – Macrologic has developed MlaaS Security Operation Center, a platform for Cyber Security, IT Service Management (ITSM) and Infrastructure and Asset Management that operates round the clock in delivering Cloud Services, Managed Services, Maintenance and Support Contract – customer satisfaction is our priority.

Our Services

Managed Services

We provide managed services including IT support, cybersecurity, cloud computing, and network management to help enterprises optimize processes and boost productivity. Our team ensures seamless and secure system operations, allowing businesses to focus on core activities with expert guidance and continuous support. Businesses can rely on Macrologic for well-maintained and secure technological frameworks.

Data Center Build

We focus on providing tailored data center construction services for businesses looking to improve their data infrastructure. Our solutions prioritize efficiency, reliability, and scalability to meet the evolving needs of modern enterprises. Whether starting a new project or upgrading existing facilities, we ensure a comprehensive and customized construction approach that aligns with industry standards and regulations.

Structure Cabling Services

Macrologic provides tailored structured cabling services for enterprises and institutions, ensuring uninterrupted connectivity for data, voice, and video. Our cabling team and technicians adhere to industry-leading protocols to provide top-tier cabling solutions to optimize network functionality and operational efficiency whether for new setups, enhancements, and issue resolution.

Maintenance Agreement

We offer Maintenance Agreements for continuous product and service performance. Customers benefit from scheduled maintenance, updates, and dedicated support to minimize downtime, boost productivity, and extend technology longevity, making it a valuable investment for system efficiency.

Consulting Services

We provide consulting services to organizations seeking expert guidance in technology. The team offers customized solutions to improve IT frameworks, operations, and achieve business goals effectively. From strategic planning to implementation and maintenance, Macrologic aims to deliver innovative and cost-effective solutions for success in the evolving digital landscape.

Infrastructure Implementation

We offer tailored infrastructure implementation services for businesses, including network design, hardware and software deployment, and ensuring a seamless implementation process. By applying expertise and industry standards, they help optimize infrastructure for growth, security, and operational efficiency. Services range from cloud systems to cybersecurity and IT updates, empowering businesses in the modern digital landscape.

Staff Augmentation

We also provide staff augmentation services to help companies meet temporary and long-term staffing needs by supplying skilled professionals for projects or ongoing support. This flexible approach allows businesses to scale their teams as needed without the costs of permanent hires. Partnering with Macrologic offers access to diverse talent, aiding in bridging skill gaps, meeting project deadlines, and achieving business goals effectively.

MlaaS Cloud

About MlaaS

Macrologic pioneers the local cloud infrastructure known today as MlaaS Cloud Services (Macrologic Infrastructure as a Service) - a multi-site cloud built from the leading technology brands, MlaaS utilizes the VMware vCloud Director to provide clients a secured, stable and robust multi-tenancy platform for public cloud. It offers the wide range of cloud services. Macrologic offers an unmatched business value to the market with customer's flexibility to choose the most ideal environment may it be on cloud, hybrid, multi-cloud and on-premise. Macrologic is the first local company to comply and achieve VMware Cloud Verified status for MlaaS Cloud Services.

MlaaS Cloud Services offerings are architected in compliance with Sovereign Cloud policies which ensures data privacy, access, and control are regulated according to local jurisdiction laws.

Enterprise Business Solutions

Tanzu by Broadcom (formerly VMware Tanzu)

helps platform engineers accelerate application development and delivery so that developers can focus on building great apps.

HRIS/Payroll System

complete and easy solution even on your most difficult HR and Payroll management problems. From keeping your employee data safe to ensuring precise timekeeping and payroll, to making your employees happy.

Zimbra Email Collaboration

An enterprise-class email, calendar, and collaboration solution built for the cloud, both public and private.

Laserfiche

Document Management System

A system used to receive, track, manage, and store documents and reduce paper. Most are capable of keeping a record of the various versions created and modified by different users. In the case of the management of digital documents such systems are based on computer programs

Dell - VSaaS

VSaaS stands for "Video Surveillance as a Service". It is essentially an analytic and cloud-based solution for accessing, storing, and managing video footage. In a traditional surveillance system, footage and management are stored and done through physical on-site devices such as an NVR or a DVR that normally lacks resiliency and security.

Extreme Business Tool (eBT) Solution

eBT is a complete web-based Accounting ERP System. It's business manage system that utilizes 5 core modules; namely, Purchasing, Sales & Distribution, Asset Management, Inventory Management, and Financial Accounting. Add-on module can be integrated, depending on the requirements of your business.

Integrated Local Government Unit Systems (ILGUS)

The Integrated Local Government Unit Systems (ILGUS) interconnects transactions of "all departments from revenue generation up to accounting and financial reporting." It empowers the Local Chief Executive and it streamlines all the processes of the LGU to give faster and more accurate reports.

Stonesoft - Cargo Dispatch Management System

CDMS is a web-based platform that provides innovative solutions for streamlined operations in the logistics sector. CDMS addresses the core challenges faced by truckers, container yard operators, and all stakeholders in the logistics ecosystem.

Brankas

is the leading Open Finance technology company powering digital transformation and world-class innovation for our customers with our financial infrastructure and API aggregation solutions.

MlaaS - MSOCaaS Cybersecurity Solutions

**STELLAR
CYBER®**

Stellar Cyber is a unified platform for security operations that integrates data from multiple sources, such as network, endpoint, email, cloud, and more, to offer comprehensive threat detection and response. This Security Operations Center (SOC) platform leverages its native capabilities, such as sensors, data lake, AI engine, threat intelligence, and automated response, to monitor, analyze, and remediate security incidents across the entire environment. It can also work with existing security tools and products, such as EDRs, cloud providers, and identity providers, to enhance their visibility and coverage. Stellar Cyber is a powerful and easy-to-use platform that can help organizations improve their security posture and resilience.

SOPHOS

Sophos MDR is a fully managed 24-7 security service delivered by experts specialized to protect your computers, services, networks, cloud workloads, email accounts, and more from advanced cyberattacks.

MDR is a managed service that blends EDR (endpoint detection and response) and XDR (extended detection and response) capabilities. The service is managed by an MDR provider that detects and remediates cyber threats.

MlaaS - VAPT

Vulnerability Assessment and Penetration Testing (VAPT) is a security testing method used by organizations to test their applications and IT networks. A VAPT security audit is designed to test the overall security of a system by performing an in-depth security analysis of its various elements;

VAPT is necessary to

- find and eradicate vulnerabilities to strengthen your system's security
- get compliant with security regulations.

MlaaS - BaaS & DRaaS

• VEEAM BACKUP & REPLICATION

Own, control, backup and recover all your data, anywhere in the hybrid cloud

- Reduce risk with comprehensive data protection
- Meet recovery objectives with confidence
- Accelerate your move to the hybrid cloud

• RANSOMWARE BACKUP

Radical Resilience Against Ransomware
Reduce risk and accelerate ransomware recovery with zero data loss

- Relentless security
- Reduce your attack surface
- Recover from anywhere, to anywhere

• VMWARE CLOUD DIRECTOR AVAILABILITY

VMware Cloud Director Availability is integrated into VMware Cloud Director to provide at a glance protection status and in context menu to start and manage replication and DR actions to protect vApps and virtual machines.

This service enables businesses to protect their data and applications by replicating them off-site. In case of a disaster, users can swiftly recover systems with minimal downtime using VMware vCloud Availability, ensuring high availability and reliability for data protection.

MlaaS - Managed ITSM and Asset Management

Everest IMS Infraon Desk

A server-less IT service management (ITSM) application that helps users manage incidents, problems, changes, requests, assets, and more. It also offers features such as AI-driven chatbots, API-friendly extensions, and automated workflows. It is certified as ITIL compatible and supports ITIL 4 service management practices.

Key Features includes; Incident Management, SLA Management, Configurable Workflow, User Management, Enriched User Experience Quickly, and 3rd Party Integration.

Why MlaaS?

- Offers wide array of products and services on Cloud from Virtual Compute & Storage, Network Security, Network Management, Business Applications, Business Tools, VDI, Data Back-up and Disaster Recovery.
- Fully managed by local and certified Cloud engineers with 24/7 support.
- High performance cloud with affordable monthly subscription and free consulting services.
- Better overall Total Cost Ownership and faster ROI.
- Leading and Industry Standard Multi-tenancy platform and Hypervisor.

Why Macrologic?

- One stop IT Solutions
- Global Partnerships
- Certified Engineers
- Continuous Innovation with MlaaS Cloud Services at the forefront
- Local market leader for S/4 HANA Infrastructure
- Presence in Key Cities of the Philippines
- Macrologic is SEC (Skilled, Experience, & Certified)
- 24/7 IT infrastructure support and managed services
- Certified ISO/IEC 27001:2013 and continues to attain further certifications: ISO 27017:2015 Code of Practice for Information Security Controls based on ISO/IEC 27002 for Cloud Services and ISO 27018:2019 Code of Practice for Protection of Personally Identifiable Information (PII) in Public Clouds acting as PII processors and ISO22301:2019 Business Continuity Management System.
